

National Internet Safety Month

How to Protect Your Business from
its Greatest Security Threat

June is National Internet Safety Month

Passwords are frequently the only thing protecting your confidential business data. Unfortunately, passwords are also the weakest link in security. Attacking password issues head-on will provide a maximum return on investment for security.

of data breaches are
due to weak or stolen
passwords.

How Can You Benefit from Using an Enterprise Password Manager

Reduce Risk of
Data Breach

Reduce Help
Desk Costs

Improve Employee
Productivity

Enforce Compliance
Standards

How to Evaluate an Enterprise Password Management Solution

Zero-Knowledge Architecture

Ensures that no one has access to your master password or encryption keys.

Ability to Share and Revoke Credentials

Provides security, structure and administrative accountability.

Role-Based Access Controls

Has the ability to assign passwords at both the individual and team level to sites, folders and vaults.

Accessible On Any Platform or Device

Supports all types of devices, major operating systems, and popular browsers.

Two-Factor Authentication Support

Provides an extra layer of protection for users.

Enterprise Grade Tools

> Active Directory & LDAP Synchronization

Integrates with Active Directory and LDAP servers to streamline provisioning and onboarding.

> Single Sign-On Integration

Integrates into the organization's IdP and complements both legacy and modern applications that don't support SAML.

> Email Auto-Provisioning

Allows large organizations to rapidly provision users with minimum administration, by using a domain-matching system.
