

## National Internet Safety Month

Stay Connected and Secure While Traveling

### June is National Internet Safety Month

Travel has increasingly become more digital by the day. Before you leave home, and while you are on the go, use the following tips to steer clear of any digital dangers.

of global travel reservations are made on a mobile device.

**Lock  
Devices**

**Don't Use  
Public WiFi**

**Disable  
Auto-Connect**

**Turn Off  
Location Sharing**

**Update Operating  
System & Apps**

**Use Two-Factor  
Authentication**

**Disable  
Bluetooth**

### Getting Ready to Go

#### Update Device Software

Before leaving, update any and all security software on your Internet-connected devices. Keep them up-to-date during your travels as well, as this is your best line of defense.

#### Turn On Two-Factor Authentication (2FA)

Utilize two-step verification for an extra layer of security.

#### Lock Devices

Make sure you set a password to lock your home screen.

#### Know Your Privacy Policies

Review the privacy policy of your apps and understand what data (location, contacts, photos, etc.) your apps can access. Delete apps you deem too invasive or no longer use.

### While On the Go

#### Disable Location Services

Location tools, while handy for trip planning and navigation, can expose your location through your apps. Turn off location services when not in use.

#### Avoid Public WiFi & Computers

Never transmit personal info or purchase items while on a public WiFi network. It's better to use a virtual private network (VPN) or your phone as a personal hotspot to surf more securely.

#### Monitor WiFi & Bluetooth Use

WiFi and Bluetooth can enable apps to track your whereabouts when turned on. Switch them off when they're not needed.

#### Use a Password Manager

Store and encrypt your logins and sensitive information in a password manager.
