

5 Tips to Keep Your Enterprise and Remote Workforce Secure

DEFINE

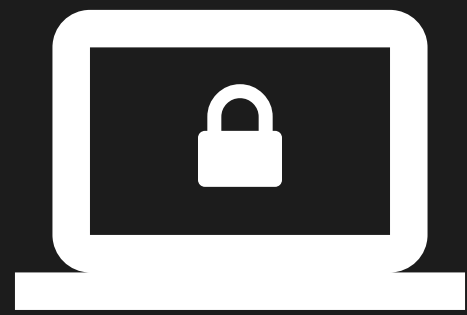

Clear Security Procedures for Incident Reporting & Responding

Ensure all employees know exactly who to contact and are aware of emergency procedures to perform on their end

Prepare for **PHISHING** Attempts

Scan inbound emails for threats and unknown file types; add suspicious emails to a blocked or spam list

BACK UP All Mission-Critical Systems & Data

Make sure to save the organization's critical files and data on a remote system so they can be restored

UPDATE

All Software & Firmware

Check to make sure all your software is running the latest version

ENFORCE

A Strong Password Policy

Confirm if your employees are using strong passwords and multi-factor authentication (2FA) on all devices and systems
